

## Key Instant Recall Facts

## Year 3 – Spring 2

## I can recall facts about durations of time.

By the end of this half term, children should know the following facts. The aim is for them to recall these facts **instantly**.

|   | <u>Num</u>          | ber of day  | <u>ays in each month</u> |          |
|---|---------------------|-------------|--------------------------|----------|
| There are 60 seconds in a minute.<br>There are 60 minutes in an hour. | January<br>February | 31<br>28/29 | July<br>August           | 31<br>31 |
| There are 24 hours in a day.<br>There are 7 days in a week.           | March               | 31          | September<br>October     | 30       |
| There are 12 months in a year.<br>There are 365 days in a year.       | April<br>May        | 30<br>31    | November                 | 31<br>30 |
| There are 366 days in a leap year.                                    | June                | 30          | December                 | 31       |

Children also need to know the order of the months in a year. They should be able to apply these facts to answer questions, such as:

What day comes after 30<sup>th</sup> April?

What day comes before 1<sup>st</sup> February?

## Top Tips

The secret to success is practising **little** and **often**. Use time wisely. Can you practise these KIRFs while walking to school or during a car journey? You don't need to practise them all at once: perhaps you could have a fact of the day. If you would like more ideas, please speak to your child's teacher.

<u>Use rhymes and memory games</u>– The rhyme, *Thirty days hath September*, can help children remember which months have 30 days. There are poems describing the months of the year in order.

<u>Use calendars</u> – If you have a calendar for the new year, your child could be responsible for recording the birthdays of friends and family members in it. Your child could even make their own calendar.

<u>How long is a minute?</u> – Ask your child to sit with their eyes closed for exactly one minute while you time them. Can they guess the length of a minute? Carry out different activities for one minute. How many times can they jump in sixty seconds?
